- ▶ Upgrade Accessory to Stab/SAS Sets:
  - PN 05-0330-07 (Army)
  - PN 02-1103-01 (Navy)
- ▶ CECOM Approved

### Pod Adapter Set

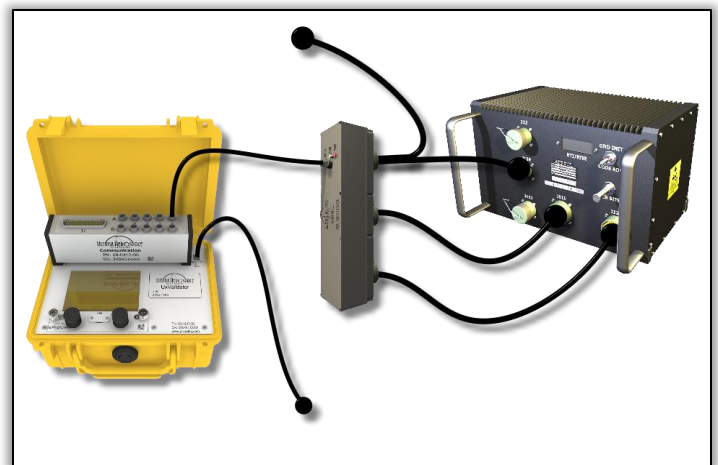

The Pod Adapter Set allows the UxValidator Series I (PN 03-1217-02) to be compatible with UxPod technology. This opens the door for several UxPod solutions to be added to a test and troubleshooting toolset that contains an UxValidator Series I.

The Pod Adapter ICD mounts to connectors J1 and J2 on the UxValidator and a high-speed data cable connects between the ICD and any UxPod. The Pod Adapter Set also contains the necessary self-test adapters for testing the "A" and "B" data ports on the ICD.

In addition, 115VAC to DC and +28VDC adapters are included to supplement those included in the UxValidator™ Series I contained in the H-60 Stab/SAS Test Set. Only one Pod Adapter set is required per UxValidator Series I.

### UxValidator™ Technology . . .

The UxValidator™ family of test solutions delivers versatility, ease-of-use and reliability never before available in portable, application-specific troubleshooting equipment.
